Environmental Regulatory Standards for the Rocky Flats Plant

John  
J G Davis, Associate General Manager  
Standards, Audits, and Assurance  
EG&G Rocky Flats, Inc

This memorandum references your June 21, 1993, memorandum 93-RF-6321 that provided information on Applicable or Relevant and Appropriate Requirements (ARARs). While I appreciate the information, I am familiar with ARARs and their application under CERCLA. My specific question on standards was, "What set of standards should we use on a sitewide basis to look to when deciding which ones to apply at a specific Operable Unit (OU) location?" The intent behind the question, then, is to request a master list to choose from which is kept current as regulatory standards change. I also recognize the list may have different standards for different uses (e.g., drinking water versus nondrinking water supply, residential use versus administratively controlled access).

Can your Standards, Audits and Assurance organization provide and maintain for me this master list of standards?

James K Hartman  
Assistant Manager for Transition  
and Environmental Restoration
